		SCALE: 1:1	SHEET 1 OF 17

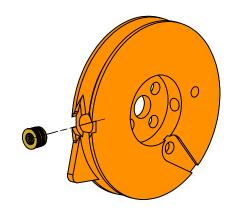

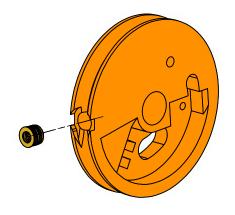

Note: There are three variants of this subsystem.

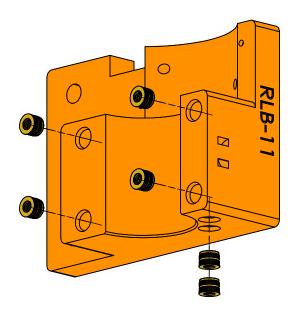

- RLB-10 for Jubilee
 - use an LDO motor
- RLB-10S for Jubilee
 - uses a StepperOnline motor
- RLB-09RC for the Railcore
 - uses an LDO motor

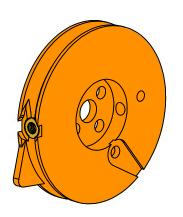

Each variant has a unique base plate. RLB-10S uses a unique base plate and motor clip. Make sure you've printed the parts that correspond to your motor.

Press fit the bushing such that it is flush with the surface of the pulley.

Fully tighten this screw.

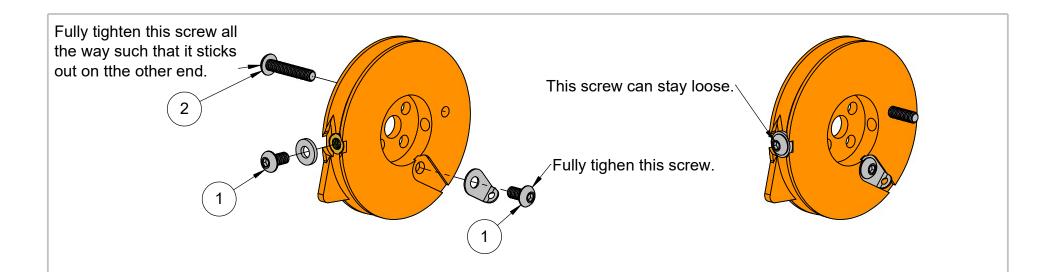

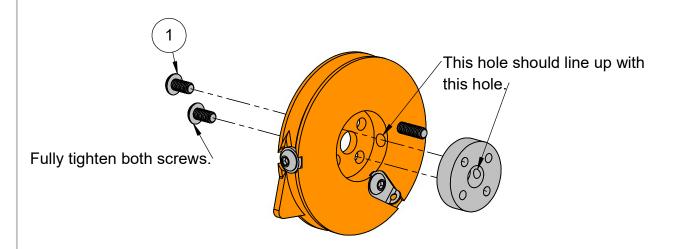

[∖]This screw can stay loose.

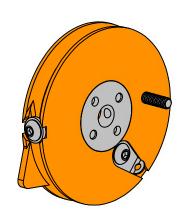

ITEM NO.	DESCRIPTION	QTY.
1	Floating Half Pulley with Insert	1
2	M3 Buttonhead Screw, 6mm long	2
3	Bent M3 Solder Terminal Lug (Bend A)	1
4	Sleeve Bearing, 6mm bore, 10mm long	1
5	M3 Washer	1

Solder together the following limit switch harness. Be sure to insulate the solder connections with heat-shrink tubing.

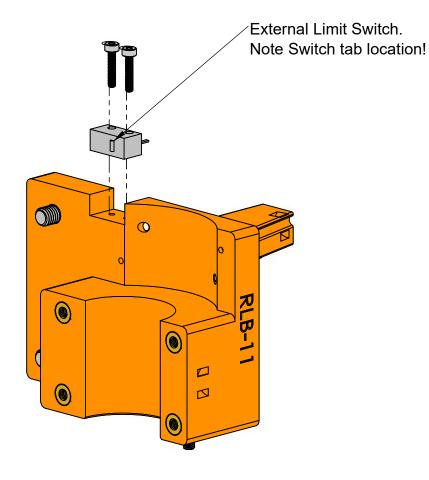

Note wire lengths with respect to switch buttons.

Note: KK Connectors are included with Duet hardware.

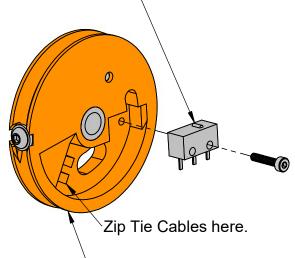

24-26AWG all limit switch wires

Note: this is just a schematic representation. Join these parts loosely together on a flat table following the color coding.

Note: tape the spring guide to the table for ease of assembly.

These two pieces can be sleeved together in a nylon sleeving, but leave at least 100mm exposed on the carriage side and 150mm exposed on the Lock side.

Push each spring guide into the printed part until they hard-stop at about 10mm deep.

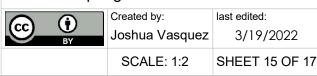

19

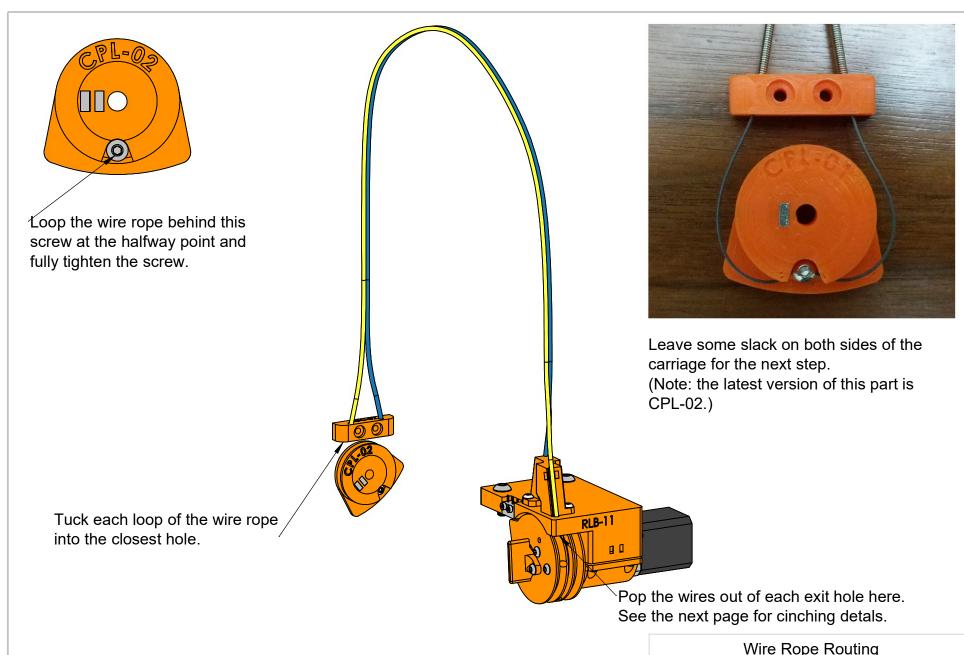

Push each Spring Guide into the hole until it hard-stops. Then apply two zip ties to secure each spring guide at the locking side..

RLB-11

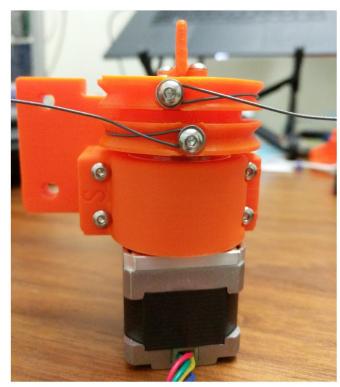

ITEM NO	DESCRIPTION	QTY
1	1600 mm wire rope	1
2	Carriage Pulley Assembly	1
3	Spring Guide, 600mm long	2
18	Spring Guide Capture (SGC)	1
5	Optonal: Braided Cable Sleeving 350mm long	1

Spring Guide Installation

	1600 mm wire rope	1		01	
			SCALE: 1:2	SH	

Cinch both wire rope ends down very lightly (upper left image), just enough such that the wire rope cannot pop out. The location of where they are cinched doesn't matter now as they will be properly located later.

Once the wires are cinched, you may optionally take in the slack until there is no more excess wire rope on the carriage side (left image), but do not put tension into either side of the rope. This setup makes it easier to install on the machine later.

(Note: The latest version of this part is CPL-02.)

Wire Rope Termination
